National TWIN TRANSILLUMINATOR

Simultaneous Transillumination of BOTH—Sinuses, Eyeballs, Pupils, Etc.

(By Dr. Louis H. Schwartz)

- The **ONLY** transilluminator assuring *real Antrum penetration* because of the *combined intensity* of two lamps instead of the usual single bulb. (See illustration showing glass sheath over both lights and placed in the mouth.)
- The **ONLY** instrument showing BOTH — Anterior Chambers, Conjunctivae, Irides, Pupils, Eyeballs, at the same time for *positive* study and comparison.
- Light carriers are slidably adjustable to compensate for all variations of facial measurements.
- Employs standard flashlight lamps, *no costly "special bulbs"*. Bulb savings alone, pay for this instrument in short order.
- The **ONLY** transilluminator that covers *every requirement*, as one bulb may be removed so that the instrument can also be used as a *single transilluminator*.

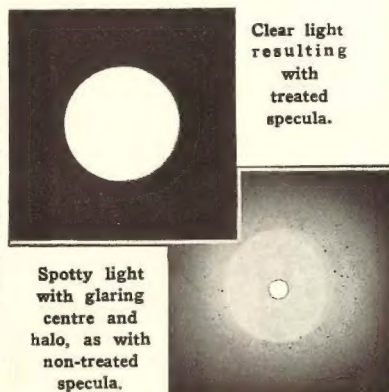

Improved National OTOSCOPE ... Better Than Ever

- Rectilinear adjustment of light carrier provides *unlimited space for instrumentation* — No obstructions (patent pending).
- The patented illuminating system, employing an ordinary *flashlight bulb*, plus the new specula with treated inside surfaces, results in ear drum illumination of unequalled quality and intensity. These features, combined with the adjustable speculum holder, make it *the outstanding diagnostic and operative instrument*.

- A new method of treating the inside surfaces of specula (patent pending) eliminates side-wall reflection and delivers clear, shadow — free light to the drums — *No glaring centre spot* — No halo.

"Neitramold" specula are more attractive, boilable and guaranteed for life. Flashlight bulb illuminating system (patented) saves 90% of bulb replacement costs.

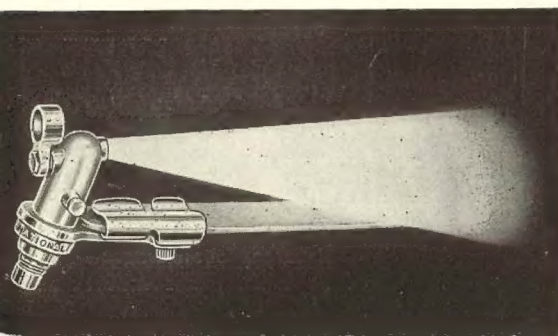

Clear light resulting with treated specula.

Spotty light with glaring centre and halo, as with non-treated specula.

NEW TONGUE BLADE HOLDER FOR STUDENT SETS N28.....\$1.00

- Fastens to the otoscope light carrier arm after removing the speculum holder. Instantly attached—No speculum ring to block vision.

National DOUBLE-DISC OPHTHALMOSCOPE with "Vest Pocket Darkroom"

- The ONLY ophthalmoscope with the "Vest Pocket Darkroom".
- The ONLY ophthalmoscope made of "Neitramold"—No plating or oxidizing to wear — lastingly beautiful — light in weight.
- The ONLY instrument providing the complete range of 96 *Dioptric Values*, plus *Color Filters* for red-free, daylight and clear light.

PRISM illumination—Concentrated shadow—free light without glare.

Instantly detachable "VEST POCKET DARKROOM" excludes all extraneous light

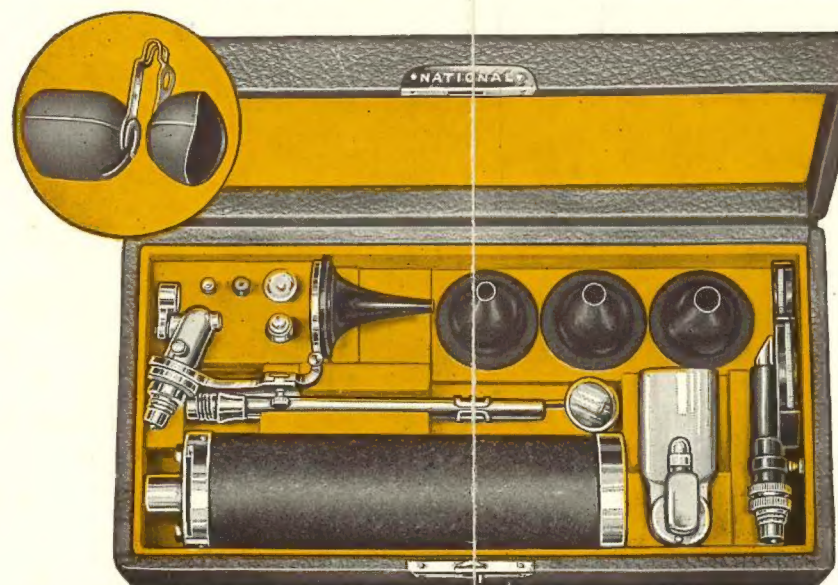

ILLUMINATED zero index shows, in the dark, when disc is at zero aperture—the starting point for examination.

- The darkroom attachment brings out detail and assures telescopic sharpness of definition by excluding outside light, and preventing light reflections from both surfaces of the ophthalmoscope examining lenses.
- The single disc "Neitramold" ophthalmoscope is identical in construction, but does not have color filters or range above 20 dioptries.

THE COMPLETE SPECIALISTS' SET

INCLUDES: Otoscope (patented) with 4 "Neitramold" specula, double-disc "Neitramold" ophthalmoscope, "Vest Pocket Darkroom", large battery handle, illuminated (patented) tongue depressor holder, "All-Metal transilluminator, laryngeal mirror and spare bulbs, in attractive, plush-lined case.

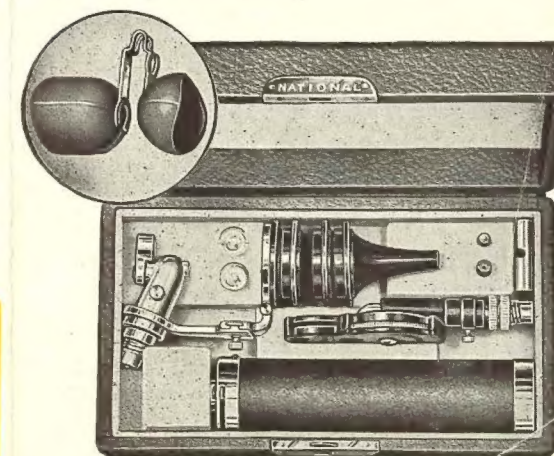

N2033.....\$58.50

National diagnostic sets incorporate more exclusive, patented features.

STUDENT SETS

COMBINATION SET No. 1\$43.50
Includes otoscope, single disc ophthalmoscope, "Vest Pocket Darkroom", new tongue blade holder and large battery handle.

COMBINATION SET No. 2\$42.50
Same as No. 1 but with medium battery handle (as illustrated)

N 25 Otoscope Set complete in case, with medium handle\$21.50
N 21 Otoscope Set complete in case, with large handle 22.50
N 2134 Otoscope and Single Disc Ophthalmoscope combination set with large battery handle 42.50

N76

N71

Operates on battery or transformer. Hooded bulb—Maximum penetration — Practically unbreakable — Boilable. For hydroceles, breasts, cervixes, sinus, antrum and mastoids. Note Foster breast shield.

Either Curved, Straight or Right Angle Transilluminator, with bulb\$4.75

"GYN-A-LITE" CLIP LIGHT

N53\$3.75

Operates from battery or transformer. Concentrated light. Includes: Boilable cord, "Gyn-a-lite" clip and searchlight bulb.

National SIMPLIFIED CONTROL CAUTERY

*Featuring the
"Dual Position"*

**CAUTERY
PISTOL
with the
"Trigger
Lock"**

14 Exclusive Features!

- The NEW National is the most COMPLETE cautery ever developed.
- The ONLY cautery with the "Dual Position" Cautery Pistol and "Trigger Lock".
- The ONLY cautery with the "Hidden Shelf", an accessory compartment.
- The ONLY cautery supplied with the "Gyn-a-lite" vaginal speculum clip set.
- NO OTHER cautery so easy to operate.

BUILT TO LAST A LIFE - TIME

The NEW N90 HEAVY DUTY, Simplified Control Cautery Set includes: Transformer with Compartment, Illuminated Cautery Pistol, "Gyn-a-lite" Clip Set, and a choice of three cautery tips.

(For 110 Volt, 50-60 cycle A.C.) \$39.50

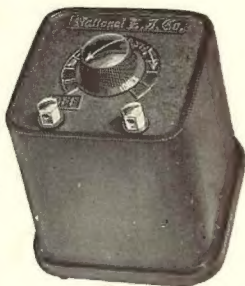

National BATTERY BOX

N150.....\$7.50

Molded "Bakelite" case.
Delicate control.

Refills with 4 large
flashlight cells.

Absolutely no danger of
shock!

National SHOCK-PROOF CONTROLLER

N60\$8.50

Operates all instruments. Split
plug fits wall outlet or screw
socket.

Large knob permits fine voltage
adjustment.
